Hardware features of 3D holographic display cabinet

Multiple categories: Holographic display cabinets have three different viewing angles to choose from, 180 degrees, 270 degrees, and 360 degrees. Customers can choose the appropriate product category according to their needs and customize a unique appearance design.

Super strong tempered glass: The outer glass of the holographic display cabinet is high-strength tempered glass, which can prevent violent damage, and there is no exposed connection on the outside, which is more beautiful overall.

At home or in school, make education more engaging and fun.

In museums and at events, conferences, use visual storytelling to grab attention and engage the audience.

In gaming, use Bluetooth controllers to create interactive games.

In retail, promote products by placing a physical product inside a device and introducing it with animation.

In healthcare, show your 3D data to patients, such as 3D dental scans for dentists or educational presentations of healthcare information.
