Holographic display cabinet is a new technology of three-dimensional imaging suspended in the air, also known as three-dimensional phantom imaging.

Strong three-dimensional image sense: Sometimes it takes people's vision to the distant starry sky, which is sometimes far and sometimes near, sometimes bright and sometimes dark, and changes unpredictably; you don't need to wear any polarized glasses to enjoy the 3D phantom stereoscopic display effect, which gives people a visual enjoyment with a strong sense of depth;

Good visual effects: the images suspended in the air are sometimes right in front of your eyes, giving you a feeling of being within reach;

Great appeal and good effect: strong visual effects make it easier to attract customers' attention and achieve an unforgettable effect;

Differentiated marketing can be achieved: It helps to improve the brand and product grade and achieve differentiated marketing.

1. Used to display high-end and exquisite products such as jewelry, watches, cosmetics and digital products.
2. High-end hotels and high-end clubs are used to display corporate LOGOs, famous wines and cigarettes.
3. Real estate apartment display, theme park display, cultural center display, museum antique display, etc.
4. Virtual hosts, product launches and other places display.
