

## Custom Holographic 3D Displays Gauze Screen Projector 90UM Thickness

### Our Product Introduction

#### Basic Information

- Brand Name: Yeoan or OEM
- Model Number: HF
- Minimum Order Quantity: 50
- Price: negotiate
- Packaging Details: talk with me
- Delivery Time: 25 days
- Payment Terms: L/C, T/T

#### Product Specification

- Tensile Strength: 2600.LBS%
- Hardness: 2H
- Thickness: 90UM
- Maximum Length: 100 Meters
- Width: 3-7 Meters
- Maximum Viewing Angle: 180
- Light Transmittance: 78%
- Size: Customized
- Highlight: **Holographic 3D Displays Gauze Screen ,  
90UM Thickness Holographic 3D Displays ,  
custom hologram projector 90UM**

## Product Description

### Product name: Holographic projection gauze screen

Holographic invisible gauze screen. Display a new projection medium in important event scenes, which is more transparent than traditional screens, and can make the image suspended in the air to produce a hazy and magical visual effect. Bring a high, large, and visual feast to the viewer.

The biggest advantage of the holographic invisible gauze is that it is transparent. While maintaining transparency, it can ensure that the picture is still bright and colorful. The audience can see any object on the back through the holographic invisible gauze, and can also use the light transmittance for secondary imaging. It is more transparent than the traditional projection screen and can make the image suspended in the air. Through the mapping of multimedia projection equipment or stage lights, the dynamic video is displayed on the holographic invisible gauze, which can emerge a dreamy and gorgeous picture. Through multimedia equipment, multi-screen fusion or splicing technology can be used to complete the super-large display screen and create a spectacular scene. It can also be combined with the LED display behind the gauze to achieve a double visual effect. It can be said to be a perfect combination of art and technology, which is very ornamental and the best way to capture target customers. It can be installed in a variety of ways, such as curtain type and hanging electric remote control type. In addition to many standard sizes, we can also accept special customization requirements of users to meet all reasonable requirements of users to the greatest extent.

**Gauze curtain categories:** pearl white invisible gauze curtain, deep space gray invisible gauze curtain, magnetic black invisible sand curtain

**Application scope:** holographic concerts, holographic stage plays, holographic theaters, colleges and universities, radio and television, banks, water conservancy, real estate, transportation, hotels, advertising, post and telecommunications, performing arts and other industries; specializing in large-scale holographic product launches, corporate annual meetings and other special effects construction and installation services, a privately-owned enterprise specializing in the production and processing of various planning halls, science and technology museums, museums and other products, and its integrity, strength and product quality are recognized by the industry. Friends from all walks of life are welcome to visit the company for guidance and business negotiations.

### Product parameters:

Width: 3-7 meters

Maximum length: 100 meters

Thickness: 90UM

Light transmittance: 78%

Maximum viewing angle: 180 degrees

Gain: 2

Tensile strength: 2600.LBS%

Hardness: 2H
