

Interactive Transparent Film Holographic 3D Displays Glass Window Custom

Our Product Introduction

Basic Information

- Brand Name: Yeoan or OEM
- Model Number: D2019
- Minimum Order Quantity: 50
- Price: negotiate
- Packaging Details: talk with me
- Delivery Time: 30 days
- Payment Terms: L/C, T/T

Product Specification

- Width: 1520mm
- Maximum Length: 25meters
- Thickness: 100UM
- Light Transmittance: 92%
- Viewing Angle: 150
- Hardness: 2H
- Projection Type: Rear Projection
- Contrast Ratio: 500:1
- Highlight: **Holographic 3D Displays Glass Window ,
Interactive Holographic 3D Displays ,
custom interactive holographic display**

Product Description

Product name: holographic transparent projection film; model: D-2019

Scope of application: windows, specialty stores, stages, exhibition halls, exhibitions, virtual hosts.

Projection film product features: This product has the characteristics of anti-oxidation and anti-corrosion, long service life, wide viewing angle, not afraid of strong light, not afraid of water, strong color reproduction, high saturation, strong light rate, and both sides can be imaged. The appearance is simple and ultra-thin, beautiful and generous, fully reflecting the fashionable and avant-garde atmosphere. The screen size can be customized or combined according to actual requirements. The product has been updated with technology, the surface is not easy to scratch, and it is easy to care during use. Super light! Not afraid of water and sunlight, the image quality is clear. There is no distinction between inside and outside and direction, and both upright and long strips can be used. Whether it is round, triangular or square, it can be freely made into the desired shape. There is no limit to the projection angle of the projector. It can be combined and expanded infinitely, and spliced seamlessly. It can be customized according to special needs. It is easy to install and construct without damaging the original hardware space and decoration.

It is made of high-quality smooth polyester film, which is composed of a diffusive adhesive layer, a hard-processed layer, and an anti-static layer. It can be easily used or suspended electric.

Advantage:

01. High definition, strong light resistance, ultra-light, anti-aging and many other incomparable advantages;
02. Able to form images in large square meters, fully meet the display of various products, no need to stick, just use tools to unfold;
03. Realistic imaging, dazzling three-dimensional effect, no need to wear 3D glasses to achieve a lifelike effect;
04. Attractive and effective: strong visual effect. It is easier to attract customers' attention and achieve an unforgettable effect;
05. Its exquisite and slim structure makes the free environment decoration design more free and humane, making the screen and the environment integrated, greatly improving the temperament and taste
06. Differentiated marketing can be achieved: it helps to improve the brand and product grade and achieve differentiated marketing;
07. Special customized sizes can be accepted according to special needs: easy installation and construction, without damaging the original hardware space and decoration.

Suitable temperature range: 0°C~60°C

Elasticity (temperature): 0°C (-0.034%), 40°C (+0.34%)

Elasticity (humidity): 20°C 100%RH (+0.059%)

Weight: about 250g/

Thickness UM 100

Width MM 1520

Length M 25

Glue layer Yes

Transmittance 92%

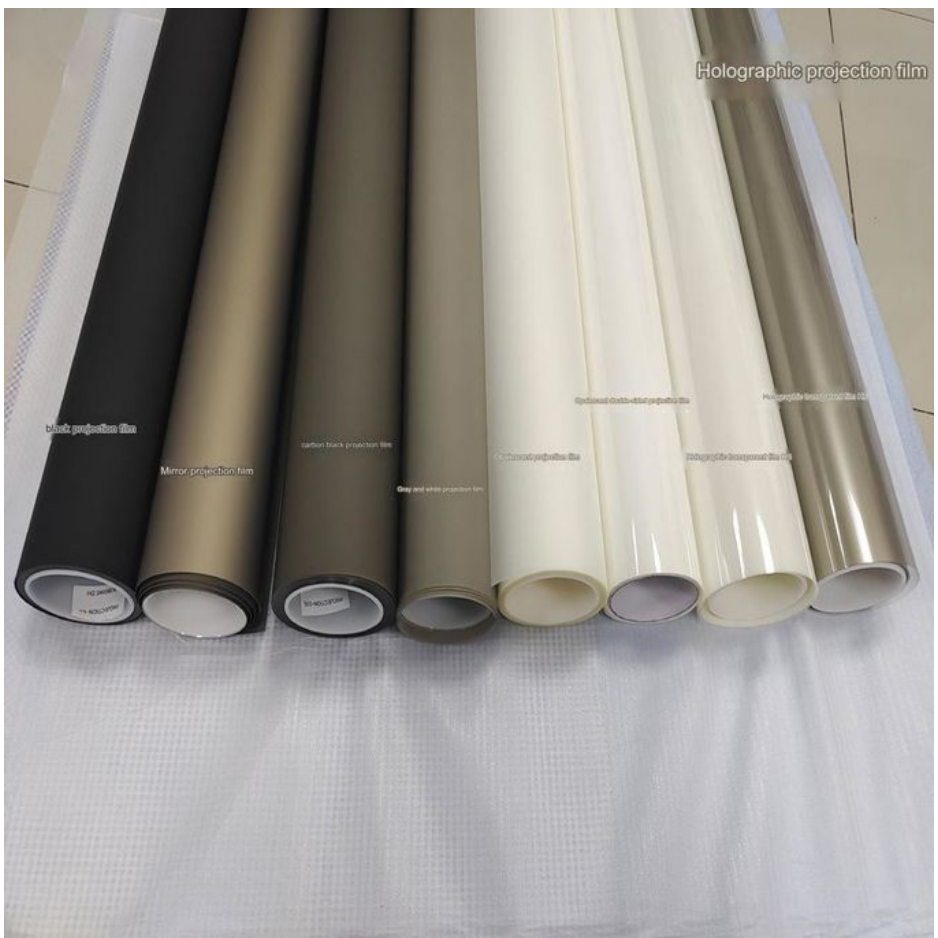

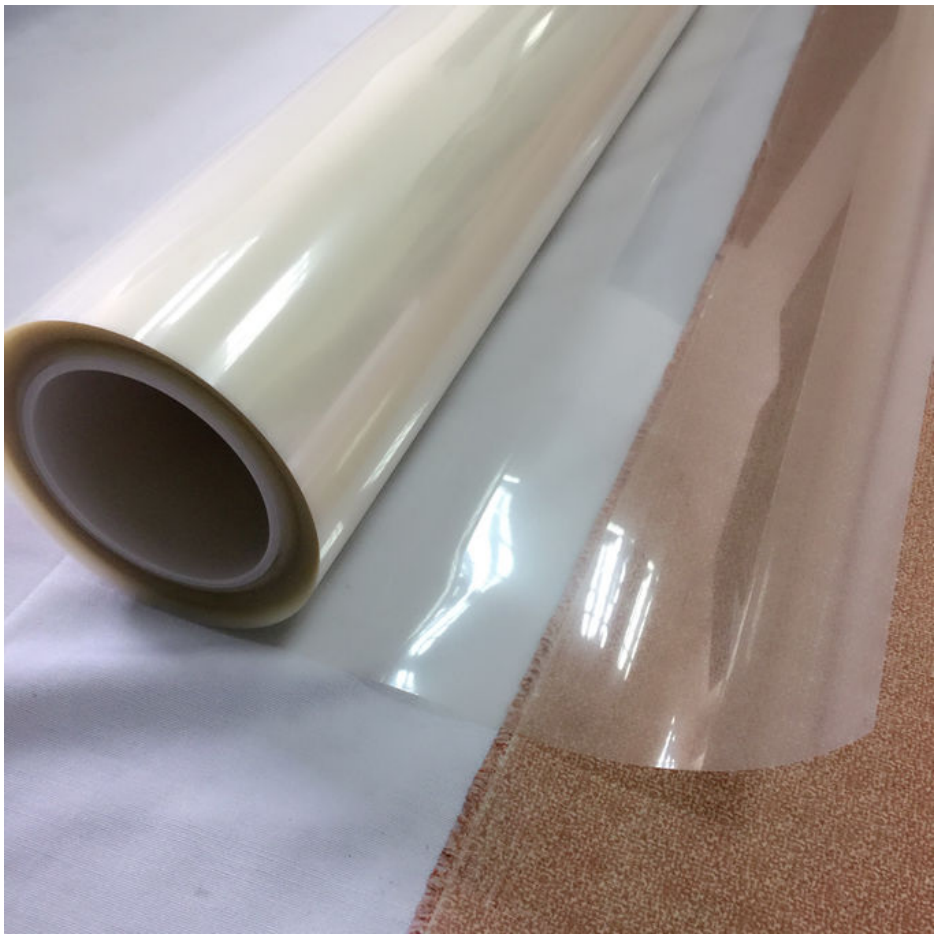

Viewing angle 150

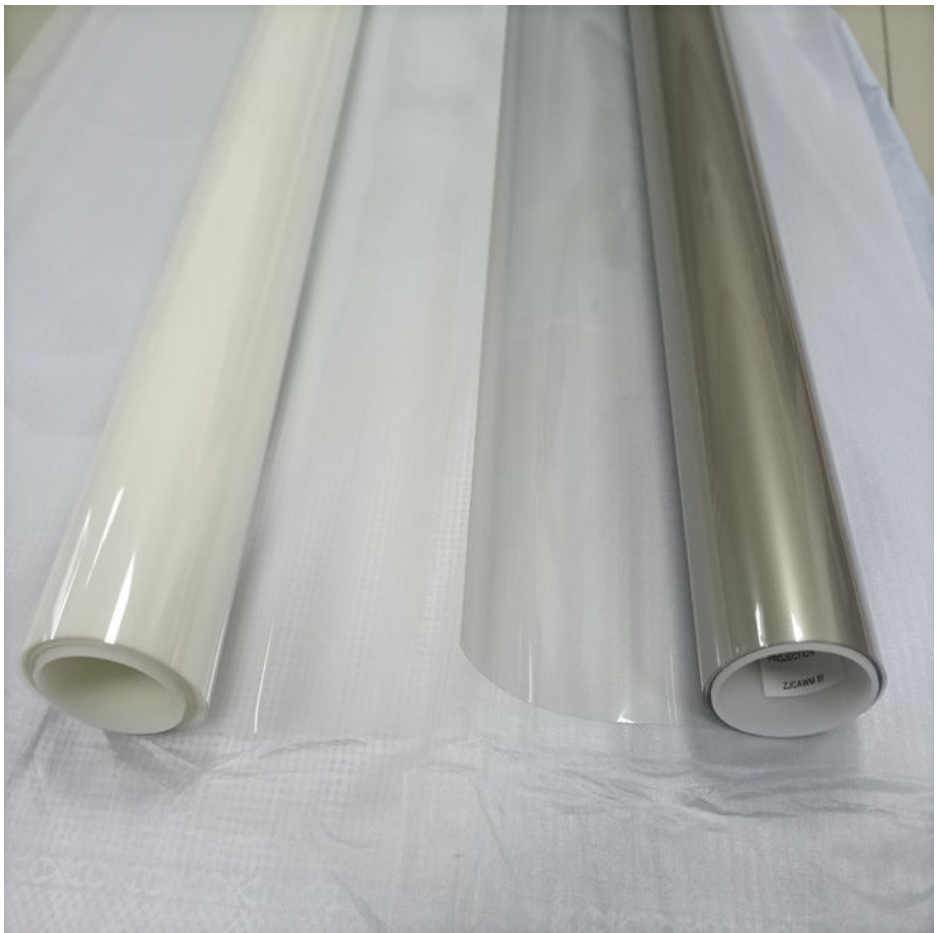

Contrast 500:1

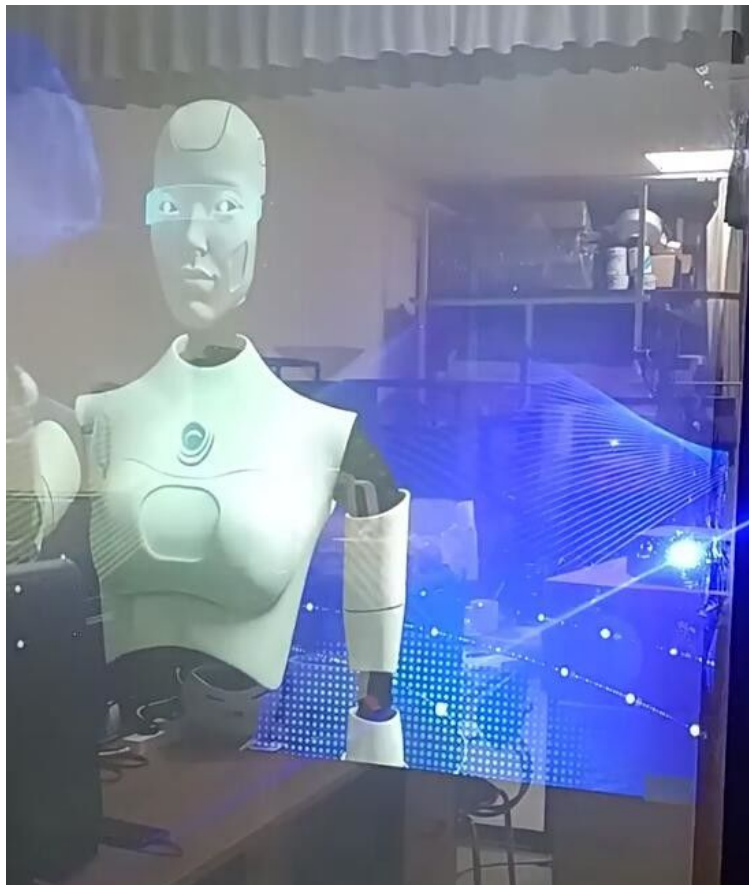

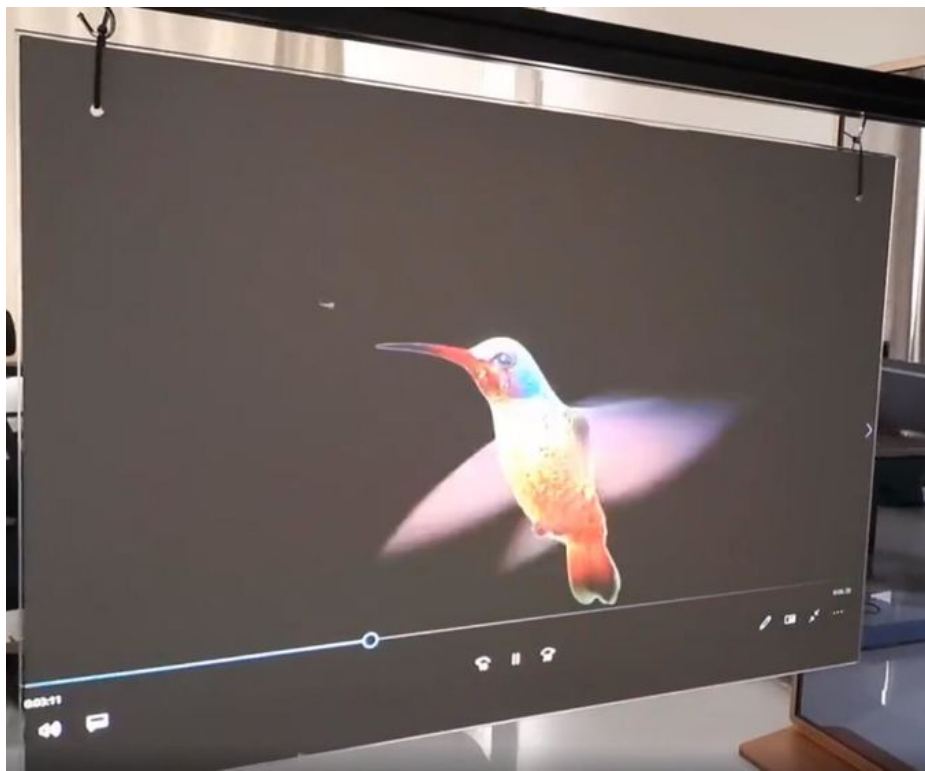

Gain value 1.0

Projection method: Rear projection type

Features: Transparent wide viewing angle
