Product Description

Description:

The query machine is gradually being used in all aspects of our daily life and work. For example, we can see the all-in-one machine in many occasions such as telecommunications business halls, postal business halls, tax collection halls, city streets (city information query), office buildings, airports, stations, banks, museums, libraries, exhibitions, hospitals, hotels, etc.

The touch all-in-one machine is composed of advanced touch screen, motherboard (high-performance, low-power industrial-grade special motherboard, Intel processor), memory, hard disk (high-speed solid-state hard disk), graphics card and other electronic components.

The body shell is made of high-quality cold-rolled plate, and the surface is industrial-grade paint process wear-resistant design, rust-proof, anti-magnetic, and anti-static. Through the intelligent operation platform, it can realize public information query, advertising display, media interaction, conference content display, offline experience store product display, etc. The operation is simple, fast, safe and stable, meeting more daily interactive display needs, and supporting 7X24 hours of uninterrupted and smooth operation.

The product design is simple and elegant, more aesthetic, cost-effective, supports wall-mounted installation and floor-standing installation, easy installation, rich maintenance door, easy and convenient maintenance, industrial-grade parts, better heat dissipation, lower power consumption, metal front frame design, fine workmanship, and humanized detail design.
