Product Description

The UST projector uses an ultra-short-throw lens, it can project a 40-100 inch display screen in a space less than 0.5 meters from the wall by simply placing it in the living room. It is reflected by the screen into the human eye. According to ophthalmologists and evaluations, laser TV products are harmless to the naked eye. The screen has no electromagnetic radiation, is eye-protecting, healthy and comfortable, and is 20% more comfortable than paper reading.
